Unconditional Love

Tower Of Power

I used to be a part of lover
Just drop in everyone since a while
I had to do with undercover? Yes I did
That was just my style

Now I have the strangest feeling
This love that's really got me really
Everything we do is together
This love I have for you is forever ooh

Chorus:
Unconditional love, unconditional
That is what I have for you
Here's my position of love, unconditional
Love is what I have for you

Never care about tomorrow
I only thought about what I could get today
I left behind a tread of sorrow... hum
That was just my way

Still it didn't even come close
To feel in up that all and my soul
Now I had a change apart
Girl I hope that we will never apart

Chorus

You love me, I love you
And that's the way it's falls to be
Together forever from now to eternity

Chorus... Fade out
