

# Good Good Things

## Descendents

(Lyrics and Music by B. Stevenson)

\* I know a place, up in the air

It's not very far, I've been there before

    I know a place, cool and warm

    Cooling my blood, warming my heart

\*\* So come on down and walk with me, and tell me I'm your man

    I only want to know a couple of things about you

    Where were you when I was in so much trouble with myself

    And do you still believe in me like I believe

\*\*\* I've been thinking good good things about you

    Cool and warm, good good things about you

    If you've been thinking good good things about me

    So cool and warm when you put your arms around me

        On my own, I know where to go

        Living the lie, in your eyes

        I know a place, cool and warm

        Cooling my blood, warming my soul

    So come on down and walk with me, and tell me I'm your man

        Let's see if I can get it right with you this time around

        I'm not afraid of losing you, my little girl

        But do you still believe in me like I believe

\*\*\*
