

# Ordinary Lives

## Bodyjar

The situation gets away When the chips are down And expectations up this time Disappointment fares And its all around And you won't be there Just take your time We've got ordinary lives They'll take advantage now Just take your time I'll take my chance this time We've got ordinary lives Disintegration gets away And your asking how But there's something else Too much to make a difference now But you needed more Just take your time We've got ordinary lives They'll take advantage now There's an open door Just take your time We've got ordinary lives Now I know, you never ever needed it before I'll take my chance this time I know, I tried when you were walking out the door I know, you never ever needed it before I know, I tried but you were walking out I never ever needed it before The situation gets away When the chips are down and its all around And expectations of this time Wont eventuate, only complicate We've got ordinary lives They'll take advantage now Just take your time Just take your time We've got ordinary lives I'll take my chance this time I'll take my chance this time (x2)
