Magnification

Yes

Days that we speak
I believe that you were right
Shouldn't chase the Demons
And the phantoms of the night
Some treat as lovers
Some treat as slaves
This fusion of insight
Is all that we imagine
Speak to me clearly
You're the magnet to my soul
I get so distracted
Trying to reason with it all
Like the faithful I'm clinging
To the edge of every world
Spinning in creation so afraid
To let my feelings really show
Teach me to teach me
How the key unlocks the door
As we open we surrender
Holding hands with many more
There's a feeling that's coming
There's a feeling so real
To justify, to magnify, to realize
That everything is love
Now, after all the love you have
You can always get it back
Knowing how you really see
Knowing it will come to you
Knowing it could really be
Magnificate, magnification
Magnificate, magnification
First you're smaller being alive
Growing taller, learn to survive

Magnificate, magnification
Magnificate, magnification
First you're smaller being alive
Growing taller, learn to survive
Perception of living

I realize I'm not alone
The rings that divide us
Break again upon the stone
I will show you a necklace
Where the pearls would all be lost
Without the thread between together
This would be the golden thread of trust
Speak to me, teach me
Magnify the truth you are
Waiting for the rebeginning
Birth of every star
A symbol is planted
On the brow of every child
To justify, to magnify
To realize that everything is love
Now, now giving all the love you have
Now, you will always get it back
Now, giving all the love you have
Now, you will always get it back
Giving all the love you have
Giving all the love
Magnificate, magnification
Magnificate, magnification
First you're smaller being alive
Growing taller, learn to survive
