Colours Bleed To Red

Fightstar

Desperate and armed
It's time to sail along
Let's all go, jump the bridge
Let's all go, jump the bridge
We'll move together
And push it too the end
Let's spread this across the earth
Let's spread this across the earth
I will scorch the earth
And the dust will hide my eyes
I look up at the stars
And wonder where on earth we are
It feels just like you said
When the colors bleed to red and so on
Call emergency
We'll set them up to fall
Let's all go, jump the bridge
Let's all go, jump the bridge

We'll fight together
And push it to the end
Let's spread this across the earth
Let's spread this across the earth
I will scorch the earth
And the dust will hide my eyes
I look up at the stars
And wonder where on earth we are
It feels just like you said
When the colors bleed to red and so on
I am sick of war mongering, I spit on this
Only interested in the bottom line
I'm sick of fluoride in my water
False flag states terror
In the infinite stupidity of modern man
It's time we faced up to the truth
But if we refuse to study history
Then we are bound to repeat the past
