

# Degrees Of Separation

## Badly Drawn Boy

We figure out the past through photographs  
They took while we were young  
Even though there's no way out, we'll find one  
We're the love-struck ones The degrees of separation close in  
Look who just walked in A finger on the pulse is not enough  
To show who's wrong from right  
You know it's gonna be a long drive  
Not an easy ride The degrees of separation close in  
Look who just walked in Leave the lights on  
If you're the last one alive  
There's too many strangers  
On this long lonely drive  
I'll be by your side, believe me Now no one knows the year  
You're from the past  
You look like you're alive  
You know it's gonna be a long drive  
Not an easy ride The degrees of separation close in  
Look who just walked in I kept the photograph upon the dash  
It helped me realize  
That it didn't have to be a long drive  
But an easy ride The degrees of separation close in  
We're alone again Leave the lights on  
If you're the last one alive  
Leave the lights on  
If you're the last one alive
