

# Represent (Rocked Out Mix)

## Weezer

I'm sick and tired of everybody tryna tell me what to do  
If I'm in need of your advice then surely I would come to you  
I didn't get in this position just by having a stance  
I work my bones beyond my limit just to have half a chance  
It matters how you play the game  
It matters that you can take the pain  
You don't wanna lie, steal or cheat your way to the top, ohh  
It matters what your people think  
You represent your family  
But that's just one more reason to see  
That it matters whether you win or lose  
Why don't we see who is the wizard and play some one on one?  
I think you'll find me sympathetic to ya, when I've won  
It seems you've got the throne to beat me as if it's all I takes  
But I've got skills to pay the bills and punish each of your mistakes  
You know  
It matters how you play the game  
It matters that you can take the pain  
You don't wanna lie, steal or cheat your way to the top, ohh  
It matters what your people think  
You represent your family  
But that's just one more reason to see  
That it matters whether you win or lose  
One hundred years from now  
Gonna look back on this day  
Where you goin' to be?  
And what are they goin' to say?  
I see my name in lights  
The people call my name  
It's all up to you  
Will you find your way?  
It matters how you play the game  
It matters that you can take the pain  
You don't wanna lie, steal or cheat your way to the top ohh  
It matters what your people think  
You represent your family  
But that's just one more reason to see that it matters  
Whether you win or lose  
It matters what your mother thinks  
You represent your family  
But that's just one more reason to see that it matters  
Whether you win or lose  
1, 2, 3, USA!
