Time

[Ben Folds](#)

Think of me anyway you want
I can be the problem, if that's easier
In your head, move the pieces around
Things I've said, turn the memory upside down
And it makes it better, I know
But sometimes it's hard to swallow
And in time I will fade away
And in time I won't hear what you say
In time, but time takes time you know
Tell your friends the things they wanna hear and see
Start the drums, band against the enemy
And in time I will fade away
In time I won't care what you say
In time, but time takes time you know
In your head, move the pieces round
Things I've said, turn the memory upside down
It might make it better, I know
But sometimes it's hard to swallow
In time I will fade away
In time I won't care what you say
And in time, but time takes time you know
Time takes time you know
