

# Dionysus Burning

Elliott

you feel around what they say you try to walk right down to this world dreams under cost what they say you try  
to walk right down to this world kissed lovers lost what they say you try to walk right down to this world you`re  
sold boxed and locked on time lips locked and lined is what they say you try to walk right down to this world  
suits under line what they say as and i clearly walk right down to this world to talk to you one last time tin  
covered call is mine with clicks from the rusted line sin colored call is mine delivered on other side butn down  
the river feel i divorce your kind then i just burn down the river feel i divorce your kind feel i default on  
myself feel ive got to divorce some kind feel across myself then i finally wake up and i fanally found your kind  
then i sit silent for some time when i just butn down the river then i sit silent for some time
