

# Wolf & I (Scott Brio Remix)

## Oh Land

In the endless sky we are but one  
In my dreams wolf and I Before the world you know was like it is  
I held a lover once and I was his  
And we walked along the river in the sun  
But he's a lonely man, so this was done  
The only place we had to meet was night  
While the sun he sleeps in shadows we can hide  
On the mountainside we spent our time together  
But it is gone when morning comes And you are the wolf  
And I am the moon  
Moon  
And in the endless sky we are but one  
We are alive  
In my dreams wolf and I How many days and nights will come and go  
While the only light you'll see is from my glow  
There will never be a dawn that breaks the spell surrounding us  
Til the earth dies with the sun And you are the wolf  
And I am the moon  
Moon  
And in the endless sky we are but one  
We are alive  
In my dreams wolf and I And you are the wolf  
And I am the moon  
Moon  
And in the endless sky we are but one  
We are alive  
In my dreams wolf and I In the endless sky we are but one  
In my dreams wolf and I
