

Make It Up

[Ben Kweller](#)

I need a new direction to get me around
You don't have protection as you're comin' down
Light my white candle, keep me safe
It'll put that smile back on my face, yeahHave you made up your mind? It's the only way
Have you made it up? Have you made it up?
I admire the time that you take
Have you made it up? Have you made it up?
I still think we should meditateI need a good luck charm to give me good luck
And I need a good alarm to wake me up
Light my white candle, keep me safe
It'll put that smile back on my face, yeahHave you made up your mind? It's the only way
Have you made it up? Have you made it up?
I admire the time that you take
Have you made it up? Have you made it up?You don't tell me about what's goin' on
Fuckin' make up your mind, stop draggin' it on
They're only words, they don't hurtWe can't even look into our eyes
We're not the same inside
We can let it change our lives can braid
We're constantly afraidWe can't even look into our eyes
We're not the same inside
Go sing your songs, try something new
Hope you find what's right for youHave you made it up? Have you made it?
Have you made up your mind? It's the only way
Have you made it up? Have you made it up?
I admire the time that you take
Have you made it up? Have you made it up?Have you made up your mind? It's the only way
Have you made it up? Have you made it up?
I admire the time that you take
Have you made it up? Have you made it up?
I still think we should meditate
