This is Home

I Am Ghost

Close your eyes
It's easier that way...
A golden cup
And a toast to kings
Lost and decayed, we are cut beyond our saving
But we are home now, the room is still warm.I fell in love with an Angel, a heart that isn't cold
Say goodnight, we are dying, just hold on
Bless these shadows and tested every one
They can't steal our love tonight.A century of open arms that shield the light
This battle scar is healing
Cast all the pain to the tourniquet that binds me
But we are home now, the sun won't hurt you anymore...I fell in love with an Angel, a heart that isn't cold
Say goodnight, we are dying, just hold on
Bless these shadows and tested everyone
They can't steal our love tonight.Love has given me a reason to live...
And love has given me a reason to die.I fell in love with an Angel, a heart that isn't cold
Say goodnight, we are dying, just hold on
Bless these shadows and tested everyone
They can't steal our love tonight.
I fell in love with an Angel, a heart that isn't cold, isn't cold, isn't cold
I can feel the pain of the sun as it lights up the air
I can taste the hope, it's everywhereLove has given me reasons to live
And love has given me a reason to say... goodbye.
