Believe

From Zero

I believe what comes around goes around
There's a time and a place it just makes sense
To be a man where there's meaning in life
There's a message to learn
but everybody's concerned
About my business, my actions, they're justified
And if we say back off that means step aside
'Cause would we do this to you
what's your meaning of friend
Or have you given it up I got your friend till the endAnd I believe we should be over this
But we always disagree
I believe we learn from each other
And I've had enough this timeI believe in fairness and good things come along
To those who are aware of this
So keep in mind when you're doing your thing
That if it hurts someone it might just bring
Bad karma, dilemmas, they're coming for you
And you'll be giving it, giving it up
Then you might learn your lesson
Or maybe you won't, 'cause it's righteousness
Selflessness and everything goes with thisAnd I believe we should be over this
But we always disagree
I believe we learn from each other
And I've had enough this time
