

I Love You Cause You're You

Emily Taylor Adams

They're gonna see you
Think they can read you
But they can't see the pages turning inside your heart
They don't know your story
Or where you're coming from
Every single step you took that got you this far

Oh they don't know you like I do
Just remember that I love you
The way you laugh
The way you dream
The way you look at everything
I can't promise that they will to
Oh but never change a single thing you do
I love you 'cause your you

They try to change you
Try to erase you
Paint you with colours the way they want you to be
Don't let 'em push you
And don't let 'em fool you
Into believing what you don't believe

Oh they don't know you like I do
Just remember that I love you
The way you laugh
The way you dream
The way you look at everything
I can't promise that they will to
Oh but never change a single thing you do
I love you 'cause your you

The one to stand out in a crowd
The one to be different
Find you soul and sing it loud
I know you're right
We'll come shining through
Oh but never change a single thing you do
I love you 'cause your you

Always be you
