Before The Fall

Dio

Someone had a dream
Never been to London
Never in a limousine
Something made him go
Could it be the voices
Coming from the radio
But somewhere down the line
The happiness you'll find
Will crash into a wall
Just before the fall
Someone joined the band
But he never heard the music
Couldn't really understand
No, no no
Don't know what they mean
Where's my picture

Shining from a magazine
But somewhere down the line
He'll quickly glance behind
Then smash into a wall
Before the fall
Someone ran so fast
When he saw the future
He was sure that it was just the past
Someone had a dream
Only this one ended lost
Inside the old machine
And somewhere down the line
They'll say that his is mine
And all that's left is time
Time to fall and stumble, ah
