Mirror In The Dark

Twin Shadow

Wanted me to see you like a ghost
Wanted me to break a part then love the con's closed
Throwing me around, 'round, 'round
I want you to look into my face
And I want you take a part of this place
Then tell me everything that you found, found, found
We are going down, down, down
I've tried pleasure, I've tried pain

I've tried holding you again
We can learn to be still
We will always be broken
The finest words I ever wrote to you
I'm just a mirror in the dark
Seeking up a long lost look from you
Tend down your heart, tell your heart
I won't let you down, down, down
