

Can't Be Too Responsible

[Avi Buffalo](#)

Can't be too responsible
Once again I'm charted in unknown lands
What would a family do? He went to her so tight, hoping wait and hovering sick and night with me
Calling me day and night
And I won't give in yet Something convinces to give
While another part of me knows it wrong
What I'm setting free I never saw it that way
Such surprises limit to my bed
Shaking off the dust And I won't give in yet
And I won't give any trust Both scared me for days
And you had to come back Come what may
Bring me to my faith
Again, come back to me Too distracted to come back
Anything myself included, strength it comes with less frequency
Oh so sacred is your love
That you can't decide which way to turn
What does that say about you? That your not ready yet
And I won't give in too Both scared me for days
And you had to come back Come what may
Bring me to my faith, again
Come back to me
