

Fiya Wata

Edward Sharpe & The Magnetic Zeros

I'm sending you all of my love
You with a heart to feel it (feel it)
You in the light and dark
With the eyes to see it (see it) Love, go ahead
Love stand beside us!
Love is within each heart to guide us.
And I thank the sun for shining that light
And lettin' love blaze like Fire!
Water!
We're all still learning.
The river forgives,
All tides are turning.
(You know) Some say the river won't flow
They say it's gonna stay run dry.
(You know) once more the river will flow
For every time it was dry.
We'll all be sharing a river of love
And lettin love blaze like
Fire! (River! River! River!) Love like a river,
The river, it flows.
However dark or long the night is,
Right where you are, that's where the light is. My love,
The sun is your reflection
It's true, we're one
We're all each other. Lay down your arms
Lay down your guns,
open your arms,
free your heart. And know one day I'll see you all
farther down this river
To a place we've never, ever known (no!)
Tonight our song will finally know the sound of love delivered
To its hidin' place beneath the winter snow. And I thank the sun for shining that light...
