

# This Is My Day

## Julian Lennon

Look at the starry skies  
To see what we can find  
You never know just what  
Just what we left behind  
But when you know for sure  
Will you help me out? This is my day  
The only day  
The only night I stay  
This is my day  
The only day  
The only night I stay Look at your starry eyes  
The beauty of your mind  
If I kissed you once  
Love will make you blind  
But when you know for sure  
Will you help me out? This is my day  
The only night  
The only night I stay  
This is my day  
The only day  
The only night I stay This is my day  
The only day  
The only night I stay  
This is my day  
The only day  
The only night I stay Look for me when you dream  
Or when you're all alone  
Let's look at where we've been  
The future is unknown  
But when you know for sure  
Will you help me out? This is my day  
The only day  
The only night I stay  
This is my day  
The only day  
The only night I stay This is my day  
The only day  
The only night I stay  
This is my day

The only night  
The night you let me stay  
This is my day  
Let me stay
