

# Joystick

## Atjazz

I can't count all the times that I had to say I'm sorry  
For wanting something with a few more bits than my Atari  
    Don't play a game, boy  
    They said it would get old  
    But sometimes boys like me are curious  
        And can't be told no  
    You came along and had me saying  
        "What is this?"  
Your sexiness had got me ready for the Genesis  
    Baby, grab a hold of the joystick  
        Take control of the motion  
        I can feel it when you huh-huh  
    Baby, you make all of the choices  
        Other players can join us  
    If you're feeling like you wanna play games  
        If you wanna play games [x7]  
            If you wanna play  
            Then I upgraded to Nintendo 64  
            And your first time with a joystick  
            Left you feeling like a who-ho-ho-ho  
                Hyper gamer, nothing greater  
                We can play all night  
            You'd better be some competition  
                'Cause I want a fight  
            Baby, grab a hold of the joystick  
                Take control of the motion  
  
        I can feel it when you huh-huh  
    Baby, you make all of the choices  
        Other players can join us  
    If you're feeling like you wanna play games  
        If you wanna play games [x7]  
            If you wanna play  
            I don't want you thinking  
            That I'm trying to apply pressure  
            But the pressure makes it better  
            Pushing harder makes it wetter  
                If you wanna skip a level  
                Then we'll go to level two

Just beat my boss and get me off  
And then I'll play with you  
You, you, me  
Okay, just plug the damn thing in already  
If you wanna play games [x7]  
If you wanna play  
Baby, grab a hold of the joystick  
Take control of the motion  
I can feel it when you huh-huh  
Baby, you make all of the choices  
Other players can join us  
If you're feeling like you wanna play games  
If you wanna play games [x7]  
If you wanna play
