

Searching For Love

Akon

I got everything in this world a man could ever want
If you search deeper inside me all I really need is love from you
 Searching for love, I'm just searching for love
 Searching for love, I'm just searching for love
I got everything in this world a man could ever want
If you search deeper inside me all I really need is love from you
 Searching for love, I'm just searching for love
 Searching for love, I'm just searching for love
 Every night, every night, I'm on a mood
With a super model, you might seen her from youtube
 She's got that good love waiting I got it too
Making either one us waking up next to you, right next to you
 See I may be rich, and I may have money
There's something missing in my life I always wanted
 Had a 1000 chicks, only few I called my honeys
 I need to fall in love and I can see it coming
I got everything in this world a man could ever want
If you search deeper inside me all I really need is love from you
 Searching for love, I'm just searching for love
 Searching for love, I'm just searching for love
I got everything in this world a man could ever want
If you search deeper inside me all I really need is love from you
 Searching for love, I'm just searching for love
 Searching for love, I'm just searching for love
 True gentleman, super star,
 You see me rolling in, aha, my fancy car
 Sitting ride beside me is a beautiful girl I saw
Take her to the boom boom boom and another one to mark
 I got an addiction, that's hard to cure
 You got an affliction that keeps me wanting more

 Changing my direction so I can fall in love
 So hard cause my collection is so out of this world
 See I may be rich, and I may have money
There's something missing in my life I always wanted
 Had a 1000 chicks, only few I called my honeys
 I need to fall in love and I can see it coming
I got everything in this world a man could ever want
If you search deeper inside me all I really need is love from you

Searching for love, I'm just searching for love
Searching for love, I'm just searching for love
I got everything in this world a man could ever want
If you search deeper inside me all I really need is love from you
Searching for love, I'm just searching for love
Searching for love, I'm just searching for love
I know that you would want to
Have someone in your lifetime love you
If you can show that you really want to
There'll be no limit to what your heart will allow you
When it comes to love, when it comes to love, when it comes to love
I feel empty, still searching
When it comes to love, when it comes to love, when it comes to love
I feel empty, still searching
I got everything in this world a man could ever want
If you search deeper inside me all I really need is love from you
Searching for love, I'm just searching for love
Searching for love, I'm just searching for love
I got everything in this world a man could ever want
If you search deeper inside me all I really need is love from you
Searching for love, I'm just searching for love
Searching for love, I'm just searching for love
