

# Are You There

## America

The day we lost our voice with little choice, I can't explain  
An act of agony And someone told me too that it's true when you call aloud  
It's only destiny or is it mystery But then we came around and sang our song and acted proud  
And posed for memory We made a cry to the underground  
Are you there? I looked and saw that they were still around  
But do you care? I drank a little bit, so underlit to see it now  
The show was never seen And all the time I lost is never lost  
It's only thumbing through eternity We made a cry to the underground  
Are you there? I looked and saw that they were still around  
But do you care? Who are you going to see?  
What are you going to be? You made a cry to the underground  
Are you there? I looked and saw that they were still around  
But do you care? Are you there?  
Are you there?  
Are you there?
