

# Sixteen and Pretty

## Math and Physics Club

I'm kissing my first kiss  
I'm wishing my first wish  
In my life we had such fun  
You and me- we're the only ones We're sneaking out till dawn  
Out across the neighbor's lawn  
The smell of grass and cigarettes  
Pirouettes around our heads Oh, what did we know, we were just sixteen and pretty  
Oh, God only knows, I was just like any other boy Staring through the window glass  
I took your photograph  
With my reflection looking back  
Memories in white and black Oh, what did we know, we were just sixteen and pretty  
Oh, God only knows, I was just like any other boy  
I'm kissing my first kiss  
I'm wishing my first wish  
In my life we had such fun  
You and me- we're the only ones x6
