

# Campus

## Bastille

Just another brain on the campus  
Just another man in the field  
Just another tall pile of papers  
Making it crowded in here  
Someone else's work on your thesis  
Someone else's words in your mouth  
Someone else's it's hard work and research  
Taking you up in the world  
Oh, never leave me out  
I stand by the sidelines  
Oh, never leave me out,  
I'm standing by I'll watch it all from afar  
Heaven help me  
I'll watch it all fall apart  
Heaven help me  
Help me [x4]  
I'll watch it all from afar  
Heaven help me Just another brain on the campus  
Just another man in the field  
Just another tall pile of papers making it crowded in here  
It must be so lonely, knowing what you know  
Man, it must be lonely, keeping it on the low  
Oh, never leave me out  
I'm standing by the sidelines  
Oh, never leave me out  
I'm standing by I'll watch it all from afar  
Heaven help me  
I'll watch it all fall apart  
Heaven help me  
Help me [x4]  
I'll watch it all from afar  
Heaven, help me [x2]  
I'll watch it all fall apart  
Heaven, help me [x2]  
Help me [x4]
