

Lookin' At Me

Toni Braxton

S.P. alongside Toni Braxton

So sexy, so fine

Yo, yo, girl You got me looking at you and now you're looking at me

(Eye to eye, hip to hip, we're rockin' it the whole night)

You got me looking at you and now you're looking at me My dress so short, it's borderline killer

I don't wanna hurt you, I'm more like a thriller

Looking at me, say something

Have we met somewhere before? Playing this game, I'm not about to do it

'Cause I can have him and you and you and

A grown woman, good

I got my house paid up and I'm all made up and And when you see me in my dress and good shoes

People looking at her move your lips and

'Cause I'm tired of waiting and I'm fading

All I'm saying is You got me looking at you and now you're looking at me

I think it's time you be about it

You got me looking at you and now you're looking at me

You wants to come and see about it 'Cause I'm alone with my high heels on

Want to chase me, come on like let's go

Now don't you wanna know, don't you wanna know?

I think it's time you be about it Meet me in the back room and because

I don't need everybody looking at us

All on me but I'ma let you see

My little tricks in the bag You wanna stare in my eyes, get tongue tied

You 'bout to lose it all waitin' all night

A grown woman, I'm good

Be a man come and catch me like you should And when you see me in my dress and good shoes

People looking at her move your lips and

'Cause I'm tired of waiting and I'm fading

All I'm saying is You got me looking at you and now you're looking at me

I think it's time you be about it

You got me looking at you and now you're looking at me

You wants to come and see about it 'Cause I'm alone with my high heels on

Want to chase me, come on like let's go

Now don't you wanna know, don't you wanna know?

I think it's time you be about it Girl with the purple pen tied up

Me, I'm the general, like let me Skype her

Take you to the world in a modern fly

Poppin' the champagne and you feel alright 'til the light Girl, you

Make you take it to the night

Girl, you, I'ma tie, yeah You got me looking at you and now you're looking at me
(Eye to eye, hip to hip, we're rockin' it the whole night)
You got me looking at you and now you're looking at me Full grown come and get it if you want me
Get your money, baby, I can spend it on me
You keep looking at me and I'm looking at you
Keep looking at me You got me looking at you and now you're looking at me
I think it's time you be about it
You got me looking at you and now you're looking at me
You wants to come and see about it 'Cause I'm alone with my high heels on
Want to chase me, come on like let's go
Now don't you wanna know, don't you wanna know?
I think it's time you be about it You got me looking at you and now you're looking at me
I think it's time you be about it
You got me looking at you and now you're looking at me
You wants to come and see about it 'Cause I'm alone with my high heels on
Want to chase me, come on like let's go
Now don't you wanna know, don't you wanna know?
I think it's time you be about it
