Angel Of Darkness

Hot Tuna

What kind of evil baby, I don't want to know
Would poison pure waters, just when they begin to flow
Nothing we did baby, and nothing we said
Could call up the demon, that danced inside your head(Chorus)Innocent light, trapped in the night
Angel of darkness
You've got it wrong, you don't belong
On the cold streets you roam
Sweet runaway, is no debt to pay
Angel of Darkness
Find your star, that's who you are, and follow it homeWhen you were a child baby, you were lost in the wild
With no one to save you, no shelter for your style
Those one's who protect you baby, they've broken your aim
They nurtured neglect girl, and left you standing in the rain(Repeat Chorus)(Bridge)Your fate's in your hand darling
So face it with pride
The color of night
Will shade to the light
You're looking at an angel's ride(Guitar Solo)(Repeat Chorus)Find your star, that's who you are, and follow it home
Find your star, that's who you are, and follow it home
