Passion

David Hasselhoff

I met her deep in the night
Well she was sexy and maybe
I had a chance
Did not know what to do
Then in the heat of the night
I looked at her and said baby
Gimme your hand
I got a crush on you
Don't go away
My heart is burning so, why don't you stay
There is love in the air, you will see
You will never forget the night you spend with mePassion - I want your passion
Passion - just give me passionMy God I'm losing control
Her look is driving me crazy
Making love
Would be the freatest thing
I feel it deep in my soul
I got the fire my lady
Let me try to make it clear again
Don't go away
My heart is burning so, why don't you stay
There is love in the air, you will see
You will never forget the night you spend with mePassion - I want your passion
Passion - just give me passionPassion - I want your passion
Passion - just give me passionDon't go away
My heart is burning so, why don't you stay
There is love in the air, you will see
You will never forget the night you spend with mePassion
Passion
Passion
PassionPassion - I want your passion
Passion - just give me passionPassion - I want your passion
Passion - just give me passionPassion - I want your passion
Passion - just give me passionPassion - I want your passion
Passion - just give me passion
