

Disintegrate

Cindergarden

Apocalypse, inside your hand
Matches strike, your demand
Stars gone out, mirrors break
Nothing more, give or take I watch you set the world on fire
We watch the world disintegrate
I find you with one desire
To watch the world disintegrate Dirty magic casts a spell
Ashes fall souls to tell
Sacred heart on it's knees
Voodoo scars no one sees
Coursing through every vein
The disease meets with restraint
Blood is spilled violent red
Broken words never said I watch you set the world on fire
We watch the world disintegrate
I find you with one desire
To watch the world disintegrate Turning out burning eyes
Faded convoluted skies
Dead asylums, haunted sleep
Madmen find, madmen keep
Hang on an inverted cross
Cornerstones to touch the loss
Mark my words, a record bare
Salem burns 'til no one's there I watch you set the world on fire
We watch the world disintegrate
I find you with one desire
To watch the world disintegrate Blinding how your tinders glow
Incinerate, 'cinerate!
Incandescent tortures grow
Incinerate, 'cinerate! We watch the world disintegrate
To watch the world disintegrate
