It Hurts (feat. Max Wells & Saint Pitre)

Foreign Forest

[Foreign Forest]
It hurts I know but time heals everything
Time heals everything
Time heals everything
It hurts I know but time heals everything
Time heals everything
Time heals everything

[Max Wells]
I jus I jus took on more than I can handle
I jus I jus took the flame right off the candle
I jus I jus walk away from my advantage
Hard to be alone so every time you vanish

It's like 1995 and we both thrivin
Taurus, me came wit the flowers on arrivance
I jus thought about that time back in the Taurus on the island
Try hide my loud but break the silence

Fast forward
Blast over
Last October
Half sober drive in movie in yo family whip

43 got the chills when I get a kiss
T-t-tryna focus in on everything I couldnt to fix

[Foreign Forest]
It hurts I know but time heals everything
Time heals everything
Time heals everything
It hurts I know but time heals everything
Time heals everything
Time heals everything

[Saint Pitre]
Left and right
I've been catching fades
She got my heart
But still I'm stuck up on the second base

Love her hour glass
I could watch her
Seconds fade
I Reckon fates brought us together
We gotta bond that nobody could sev, m, er
She tucked inside of my locket forever
She rock it so clever
The way she pop lock it together
Enfatuated
With every word that u saying
Hit her up like how ur day been
All emotions u been Savin
U can let em roast on me
U don't try to change me
U lead me to who I'm sposed to be
Overly driven
(Been held in) You hold me to prison
Never thought that Ud be the one that
(Ud have the key)
Could show me the wisdom
Ur kisses just know that I missin

[Foreign Forest]
Or we could get lost in our history
I know you're missin me
Miss kissin me
When you're gone, you don't know but
I still flaunt you
Play ghost baby
But i'm gonna haunt you
