

Big Sky

Probot

My world has died
All gusts and leaves
Your wondrous life
And love have ceased And all you've touched
Is dead and gone
And night for night
We're all alone Big sky throning over the tree
You've left behind
Through these tears lost
By your forlorn only child
Big sky throning over the tree
You've left behind It hurts inside
This silence new
And yet i know
The wind is you And all you've touched
Is dead and gone
And night for night
We're all alone Big sky endless in your overwhelming pain
Free at last into the light behind this eternal rain
Big sky endless in your overwhelming pain You'll never pale
You're never gone
And all within
I'm not alone Big sky
