Where To Start

Lou Doillon

Nothing, Inside and I do not know where to start
Just feels right and I'm wasted on you
And I can say that with a smile
What else to do[Chorus]
Tired of love don't need nobody
Enough is enough don't need nobody
Keep your love don't need nobody
Tired of loveSomething's not right the target painted on my heart
Is on the inside[Chorus]And I watched as the wind blew out the fire in our hearts for each-other
It's hard to begin with but I know we'll both learn to love another
And that time will be soon and it's completely up to you
For me it's just not now
Don't need nobody [x3][Chorus]
