

# Two Minds

## Nero

Even if I  
Could see into your mind  
Even if I  
Tried to see  
I'd still never really know  
If you cared  
You didn't hear a word  
That I said 'Cause I told you too many times  
It's the little things that count which can make someone feel special  
I think you're always in two minds  
And it's forever that way, I know what you're gonna say  
I told you too many times  
It's the little things that count which can make someone feel special  
I think you're always in two minds  
And it's forever that way, I know what you're gonna say Two minds  
Two minds Even if I  
Could see into your mind  
Even if I  
Tried to see  
I'd still never really know  
If you cared  
You didn't hear a word  
That I said 'Cause I told you too many times  
It's the little things that count which can make someone feel special  
I think you're always in two minds  
And it's forever that way, I know what you're gonna say  
I told you too many times  
It's the little things that count which can make someone feel special  
I think you're always in two minds  
And it's forever that way, I know what you're gonna say Two minds I told you too many times  
It's the little things that count which can make someone feel special  
I think you're always in two minds  
And it's forever that way, I know what you're gonna say  
I told you too many times  
It's the little things that count which can make someone feel special  
I think you're always in two minds  
And it's forever that way  
Two minds
