

# Altered States

## Psysex

Living in a cage  
Washing in a birdbath  
Sinking in a fish bowl  
On a broken farmI try to never lie, I really do  
I wonder if my friends will get me through  
Conscious of the way, as best we can  
Seventeen ways to kill a manStates we've been throughWe're killing nostalgia  
For future swims  
Trash all your bridges  
Kill the rock 'n' roll thingI wanna move on with no complains  
Building our walls with yesterday  
Might as well shine before you slide  
Might as well live before you dieStates we've been through  
Talk about states, we've been through  
Talk about states, states  
Talk aboutA whole lot of emptinessLiving in a state  
Of constant changing  
A river of flux  
For our tastingI try to never lie, I really do  
I wonder if my friends will get me through  
It always seems to rain when you leave  
I try to stem the flow as we bleedStates we've been through  
Talk about states, states  
Talk about states, states
