Big Karma Now

Acroma

The blind man said hey I don't care
I can smell it taste it on the air
Let all the good folks stop and stare at me
And we laced out veins with the poisons there and we
Laid down in the poison air
And everyone was a stepping stone
Except one girl and she saidDid you know?
There's a garden in your eyes
And in it grows the only thing I need
And all I want is paradise
So come and make me weak
And I won't bleed for free no moreStop here comes big karma now
And what goes around still comes around
I got mine as she laid me in the weeds
Her nails dug in and made me howl she said
I need a savior now oh so come and rescue meDid you know?
There's a garden in your eyes
And in it grows the only thing I need
And all I want is paradise
So come and make me weak
And I won't bleed for free no moreWell you know you know know
When you're home there's no place like home
When you're home you make it go away
When you're home I never feel alone
When you're home you make it go awayDid you know?
There's a garden in your eyes
And in it grows the only thing I need
And all I want is paradise
So come and make me weak
And I won't bleed for free no more
