

Radio

Osker

You're all I got
Explained to electronics, and it understood
You're all I got
Explained to electronics, and it understood
Ya, it understoodThe fucking radio takes my mind off of everything
The fucking radio takes my mind off of everything
Tonight I'll stare at everything and see nothing
And I can't believe that this is mePitch black and no one
Isn't that what I always wanted?
And it's been all I've had for so long
It'll be all I need until the day I dieThe radio takes my mind off of everything
The radio takes my mind off of everything
The fucking radio takes my mind off of everything
The radio takes my mind off of thatYou're all I got
Explained to electronics, and it understood
You're all I got
Explained to electronics, and it understood
Ya, it understoodThe fucking radio takes my mind off of everything
The radio takes my mind off of everything
The fucking radio takes my mind off of everything
The radio takes my mind off of that
