Saturn III

Fu Manchu

Spacemen destroy mega asteroids
Certain time and place, floatin' out to space
4 billion years to cross, universe so vast
For several days they tried, this will never lastSaturn III takes hold, losing all controlIn the second stage, life returns for now
The huge ship has climbed, they'll make it somehow
Reducin' their speed, the message passed
What are they up against? Time to release the hatchThe silence group strikes, something has appeared
Recheck a report, just as we feared
A closer visit planned, way beyond our reach
When the smoke has cleared, gather for the speech
