

You Know How to Love Me

[Lisa Stansfield](#)

 Hmm yeah
 Oh Measure for measure
 Your love's so much pleasure
 Like a haunting melody
It came inside and captured me And I'm so happy
 You're the rhythm of my life
 You and I together
Will stand the test of time You know how to love me
 You know how to make it right
 You know how to love me
 Sweet as morning light Sooner or later
 I knew you'd come my way
 You're welcome to my love
Just promise that you'll stay You know how to love me right
 You know how to love me tonight
 You know how to love me
You're the real that I feel never go away Hmm, seeing's believin'
 Don't you know you're a dream come true, oh
 Ain't nothin' deceivin', no
About the way that I'm lovin' you, oh You know how to love me
 You know how to make it right
 You know how to love me
 Sweet as morning light Well, nothing's forever
 And that's what people say, yeah
 But each time that we're together
Forever and a day You know how to love me right
 You know how to love me tonight
 You know how to love me
You're the real that I feel never go away, no no You know how to love me
 You know how to make it right
 You know how to love me
 Sweet as morning light You know how to love me
 You know how to make it right
 You know how to love me
 Sweet as morning light You know how to love me
 You know how to make it right
 You know how to love me
 Sweet as morning light You know how to love me
 You know how to make it right

You know how to love me
Sweet as morning light You know how to love me
You know how to love me
You know how to love me
...
