

Funny How

Jagged Edge

It's real funny to me
How one day everything's all good
And then the next
Your world comes crumbling down Well, it's funny how, it's funny how rain drops they fall
And everything's right, it's funny how everything goes wrong
You'll need a friend, it's funny how everyone's gone
It's funny how, it's funny how Not too long ago, when I needed you
You were nowhere, I couldn't find you
But now you want me, I don't wanna be
Nowhere that you can see me
So if you ever come my way
Turn and walk away It's funny how, it's funny how rain drops they fall
Everything's right, it's funny how everything goes wrong
You'll need a friend, it's funny how everyone's gone
It's funny how, it's funny how See you were always so dear to me
But then things change and you strayed away
Now I need to know why they changed
And why they couldn't stay the same
Somebody take away the rain
And give me back my sunny days I like the way it fades away
Why did they have to change
I need you right here with me
Always, always, always
I need your love, I need your love
Yes, night and day It's funny how, it's funny how rain drops, they fall
Everything's right, it's funny how everything goes wrong
You'll need a friend it's funny how everyone's gone
It's funny how, it's funny how It's funny how, when you need your friends they're gone
It's funny how suddenly things turned wrong
It's funny how, it's funny how things never go your way It's funny how, it's funny how rain drops they fall
Everything's right, it's funny how everything goes wrong
You'll need a friend, it's funny how everyone's gone
It's funny how, it's funny how Take the rain away, give me back my sunny days
Take the rain away, give me back my sunny days
Take the rain away, give me back my sunny days
Take the rain away, give me back my sunny days
Take the rain away, give me back my sunny days
