

# Not Even the King

Alicia Keys

Money

Some people so poor, all that they've got is money

Oh, and diamonds

Some people waste their life counting their thousands I don't care what they're offering

How much gold they bring

They can't afford what we've had

Not even the king

They can't afford what we've got

Not even the king Oh, castles

Some people so lonely, what good is a castle

Surrounded by people?

But ain't got a friend that's not on the payroll Oh, and I don't care what they bring

They can have everything

They can't afford what we've got

Not even the king

They can't afford what we've got

Not even the king All the king's horses and all the king's men

Came charging to get what we got

They offered the crown and the offered the throne

I already got what I want All the king's horses and all the king's men

They came marching through

They offered the world just to have what we got

But I found the world in you

I found the world in you So darling, listen

Your arms around me worth more than a kingdom

Yeah, believe that

The trust that we feel the kings never felt that Yeah, this is the song that we sing

We don't need anything

They can't afford this

This is priceless Can't afford what we've got

Not even the king

Can't afford what we've got

Not even the king
