

# Polishing Peanuts (feat. Cyph4)

## Deluxe

In the way she looked at me  
I felt weak and possibly  
Never part each other again  
And that???

Love is patient and kind  
Love is constant and blind  
It's a real crying shame I'm being forced to decline Love is patient and kind  
Love is constant and blind  
It's a real crying shame I'm being forced to decline  
Did I waste it or was meant to be?  
Do I deserve it when the only thing left is me?  
Yeah, I've been done some bitter  
A bad butt of quitter  
But my big fat mouth doesn't make me a liar???

I took a good note of that and write a crappy rap song Love is patient and kind  
Love is constant and blind  
It's a real crying shame I'm being forced to decline  
(What I do is squeal)  
(Do you think that squealing can get you away from me?)  
(Oh you, you!)  
(In my mind's eyes I see)  
In the way she stared at me  
I can see she sees in me  
Fox and sin,  
Slay me again  
In the tale knows no way  
Surrounded in a net  
Or pronounced with a scalp???

Found out I succumbed to numbness  
When I touched the blade  
To watch it drop some blood drip for every single fuck I gave  
Another day exposed closer to post-mortum  
My angels heed to escape this place  
But I won't forc'em  
A portion that the reason but I seem to pass them by  
And I'm finally grasping peace when I seem to fantasize  
Could it be???

But in a relationship trying to cap-size the hope  
I never waited???

Like in passion when I'm stranded in this land of once in??  
The wonders I can find to get need to pass the time  
To find an equal with an evil that the people can't describe  
The demons that I'm seeking livin breed in bitter and hatred  
So I guess love the only reason that my dreams are liberated

In the way she stared at me

I can see she sees in me

Fox and sin,

Slay me again

In the tale knows no way

(What happened to me tonight?)

(Ask your riddle)

(What's your name?)

(No, sorry, haven't heard of it)

(Technically and intelectually,

We're all living in an atomic age)

(Emotionally, we're still living in the stone age)
