

Gone In the Night

UFO

Honey, kick your shoes off now
And stay another night
Let's not talk too seriously
We don't wanna fight Now I don't care about your reputation
Or how you got it made
All I want is for you to stay
Don't want a charade And the lights go down
Who you with tonight
It ain't so easy holding on
Everything you seem to do, babe
Just turns out so wrong You're gone in the night
You're gone in the night
You're gone in the night People try to tell you now
About responsibilities
Those married men do's and don'ts
How it ought to be But I don't care what they say
Don't wanna hear what's true
As long as you want me, baby
You know I need you And the lights go down
Who you with tonight
It ain't so easy holding on
And everything you seem to do, babe
Just turns out so wrong You're gone in the night
You're gone in the night
Gone in the night
Gone in the night
