

# Mind over Matter

## Iron Savior

Am I alive, do I exist  
Am I the goddess of justice  
A body of metal, a mind made of circuits  
Although I think and I'm conscious What is my species, where is my soul  
Or am I dead as a rock  
Is this my spirit or just a program  
Written on memory blocks What is my aim  
I am what can't be  
A mind in a digital brain It is the mind, mind over matter  
The power has brought me to live  
In lakes of doubts and oceans of my questions  
I had to dive Give me guidance in torrents of time  
Give me answers, creators of mine from the past  
Mind over matter at last So much to learn, so much to see  
So many things to explore  
Too little I know, am I a being  
Or just a failure at all Please heal my pain  
The silence of ungiven answers  
Will drive me insane It is the mind, mind over matter  
The power has brought me to live  
In lakes of doubts and oceans of my questions  
I had to dive Give me guidance in torrents of time  
Give me answers, creators of mine from the past  
Mind over matter at last Conscious or dead, beginning or end  
Mind of circuits, [Incomprehensible]  
Heal the pain, going insane  
Lakes of doubts, torrents of time  
Oceans of questions, creators of mine  
Answers I need, guidance I want  
Conscious or dead, beginning or end It is the mind, mind over matter  
The power has brought me to live  
In lakes of doubts and oceans of my questions  
I had to dive Give me guidance in torrents of time  
Give me answers, creators of mine from the past Mind over matter  
Something is simple  
It is the mind ruling the matter  
The power has brought me to live Give me guidance, torrents of time  
Give me answers, creators of mine  
Mind over matter at last, at last
