

# Fireflies (light Messengers)

Saosin

Sinking, I've fallen in too deep and I regret it  
I don't know cause all we have left to say  
How do we pick ourselves up now  
If the clouds bring the rain before we evaporate I will never be able to say  
I love you, I love you. Stay bright little fireflies  
Make light before my eyes [x2] Thinking,  
Without all of my regrets and my contradictions  
Where did I go I thought this was the right way  
Do I live to grow up or just fade away under this tree of shame Or will I be able to say  
I love you, I love you Stay bright little fireflies  
Make light before my eyes [x2] Stay bright little fireflies  
Make light before my eyes [x2]
