## Daniel Barenboim

Quiet nights of quiet stars  
Quiet chords from my guitar  
    Floating on the silence  
        That surrounds us  
Quiet thoughts and quiet dreams  
    Quiet walks by quiet streams  
        And a window looking on  
The mountains and the sea, how lovely  
    This is where I wanna be  
        Here with you so close to me  
Until the final flicker of life's ember  
    I who was lost and lonely  
Believing life was only a bitter tragic joke  
    I found with you, oh my dear

    The meaning of existence  
        Oh, my love  
    This is where I wanna be  
        Here with you so close to me  
Until the final flicker of life's ember  
    I who was lost and lonely  
Believing life was only a bitter tragic joke  
    I found with you, oh my dear  
        The meaning of existence  
        The meaning of existence  
        The meaning of existence  
        Oh, my love
