

# Love Penetrator

## Kopek

Love penetrator put your groove like you're new  
Love elevator, spit on me, yes indeed  
Blue operator, tell me I'm a bit too young  
Crowd decorator, do your dead with your bead

Come around, we get everything you need  
Campaign, all the world will a knee  
No shame, you can go on with your life  
'Cause all we want to do is get high

Round here, we get everything you need  
Campaign, all the world will a knee  
No shame, you can go on with your life  
'Cause all we want to do is get high

I'll be there, don't know where  
Sound agitator, my backs up, things you've done  
Constipator, it's your day, where's the way  
Ride elevator, light me up, high enough

Come around, we get everything you need  
Campaign, all the world will a knee  
No shame, you can go on with your life  
'Cause all we want to do is get high

Round here, we get everything you need  
Campaign, all the world will a knee  
No shame, you can go on with your life  
'Cause all we want to do is get high

Mind chopatator, mix me up, I'm unstuck  
God consequator, devil me, let it be  
Groove imitator, spin me round, let's get down  
Love penetrator, put your groove, like you do

Come around, we get everything you need  
Campaign, all the world will a knee  
No shame, you can go on with your life  
'Cause all we want to do is get high

Round here, we get everything you need  
Campaign, all the world will a knee  
No shame, you can go on with your life  
'Cause all we want to do is get high
