

Jerusalem

Mirah

We celebrate the wars we won
The blood of history's ancient sons
We followed judah maccabee
We fought against iniquity
We saved ourselves with help from one
Who loves his children, everyone
Everyone, everyone
Everyone, everyone
So now jerusalem, you know that it's not right
After all you've been through, you should know better than
To become the wicked ones almighty god once saved you from
The lessons we should learn from all
The fighting in the days of old
When providence was still divine
The sanctuary purified
Let lightning circle all you hold
And don't uproot the olive grove
So now jerusalem, you know that it's not right
After all you've been through, you should know better than
To become the wicked ones almighty god once saved you from
So now jerusalem, you know that it's not right
After all you've been through, you should know better than
To become the wicked ones almighty god once saved you from
