

Light Years

Gift of Gab

Somewhere else on the other side of nowhere
There's another place in space
Beyond what you know as time?

Shine your light now
Travel light years
Find your light now
Travel light years (x2)

The epitome of energy enhanced
Centering
Mentally
Beginning at the end
Remembering
Entering the gates
Of the temples of infinity
Riveting innate
Sensibilities epiphanies
Levitating thoughts
From the earth
To begin to see
When the trees
Underneath my feet
Then begin to shrink
Eye level birds eye view
Where the buildings be
Tendency to
Define my alignment
It renders me
Helpless
Submit to the force that is lifting me
(Mystically?) dependent
Looks small but my sense is free-
Fall
Should I say rise?
Seems like I'm in too deep
Whole life flash by my eyes in like
23 seconds

Shine your light now
Travel light years
Find your light now
Travel light years (x2)

As I pass Mars
Mass, stars, planets, all ajar
In the solar system
See me float
Farther
Out of the galaxy
I realize there are more
How further does it go
Wonder if there are no
Endings
Beginnings
Yesterday is just tomorrow
Seen another Sun another Earth another Mars so
Far into space wonder will I see the Father
Learn the mysteries that were written by the author
If it doesn't end
Where's it from
Where'd it start though
Does it have direction
Or is all of this just
All for nothing;
Just a bunch of molecules
Who have lost our way
To my left
Thought I saw a flying saucer?

Shine your light now
Travel light years
Find your light now
Travel light years (x2)

Spotted a door
Floating in the distance
It started getting more
Close
Felt as though I was about to have a
Metamorphosis
Gold, lavender colors
Everything was more
Plus

Seven discs on the door
Spinning in a whirl
Plus
Opened up my mind's eye
Told me that a world was
Dwelling deep within
Way vaster than this world was
Flush is temporary
Just to dream
Just to surface
Everyone's connected
To one aim
And one purpose
Empty out your thoughts
Tame the lions in the circus
Opened up the door
Just to see what was inside
Woke up in my room
It was all in my mind..

It's all in the mind
It's all in the mind
It's all in the mind?
Yo

Shine your light now
Travel light years
Find your light now
Travel light years (x2)
