

# Saturday Night (Feat. Transplants & Slash)

Travis Barker

Every night is a Saturday night  
Every night is a Saturday night  
Every night is a Saturday night  
Saturday not for me Been on city boulevard broken and neglected  
When the sun sets expect the unexpected  
Listen to me closely I am gonna stay shut up  
Upon the smell causing in a necked city  
Things can go so wrong city or no city  
Two males were knocking at my door Every night is a Saturday night  
Every night is a Saturday night  
Every night is a Saturday night  
Saturday not for me I see things a little different through the blood in my eyes  
You might fool the mothers I see through you in disguise  
All rise I am getting by no lies I am getting high  
I am not worried about the next you can bet  
I will get mine my old lady got on my hip we live the three way  
But I know we are still on the hunt Every night is a Saturday night  
Every night is a Saturday night  
Every night is a Saturday night  
Saturday not for me I was moving town to town and never gonna slow us down  
Never up never a sign born to death  
I got a monkey on my back is a cause of reminder  
Let's me know I need to let it go  
There are no survivors till  
I rolling I am getting high my lungs  
And my liver are begging me to retire Every night is a Saturday night  
Every night is a Saturday night  
Every night is a Saturday night  
Saturday not for me
