

# Wilder Than the Wind

## Say Lou Lou

Five to five

And all the lights go down

Let's escape this townI don't know 'bout you

But if you want to try

Then I want to tryOur lives are buried where the snow lies

And we don't have to tryWe'll ride the night

Every second's like I'm dying here with you

And in this fight

When I'm looking back on where we're running toWilder than the wind tonightStand too still

This place will take its hold

'Til our lips burn coldI promise you

That we can make it out

We can make it nowOur lives are lonely like this island

I get so tiredWe'll ride the night

Every second's like I'm dying here with you

And in this fight

When I'm looking back on where we're running toI

See us shining as we dive into the blue

Come alive

Like a breath of air that I've been rushing throughWilder than the wind tonightLet all the lights go down

Let all the lights go down

Let all the lights go downLet all the lights go down

Let all the lights go down

Let all the lights go downOhOur lives are buried where the snow liesWe'll ride the night

Every second's like I'm dying here with you

And in this fight

When I'm looking back on where we're running toI

See us shining as we dive into the blue

Come alive

Like a breath of air that I've been rushing throughWilder than the wind tonight
