

# Bibles and Guns

## Sodom

They want to see our castles burning  
False religions from a wicked spell  
Commit crimes in ice cold blood  
The tortured souls to dwell Born dead creatures live again  
Paralyzed to kill themselves  
Reality that disappears  
Forever buried dreams The hate is spreading far away  
Or in the neighbourhood maybe  
When even life's collapse begins  
Just what we need Bibles and guns Seems like a monumental struggle  
Of good and mighty evil  
Everlasting devastation  
Until the death redeemed Born dead creatures live again  
Paralyzed to kill themselves  
Reality that disappears  
Forever buried dreams The hate is spreading far away  
Or in the neighbourhood maybe  
When even life's collapse begins  
Just what we need Bibles and guns The debris covered our hope  
To sleep the endless sleep  
Peace no longer rest in my brain  
My victim just for me Born dead creatures live again  
Paralyzed to kill themselves  
Reality that disappears  
Forever buried dreams The hate is spreading far away  
Or in the neighbourhood maybe  
When even life's collapse begins  
Just what we need The hate is spreading far away  
Or in the neighbourhood maybe  
When even life's collapse begins  
Just what we need Bibles and guns  
Bibles and guns  
Bibles and guns  
Bibles and guns
